

The publication of the Digital Book Corpus Operae I, which refers to the Antikythera Mechanism, is now complete. This work is a cooperation between the Aristotle University of Thessaloniki, the Academy of Institutions and Cultures and the Aristotle Natural History Museum of Thessaloniki.

The Corpus Operae I, contains articles in Greek and English as well as documentaries and other visual material. These articles have been published according to the peer review system. All these are accessible via the website [www.academy.edu.gr](http://www.academy.edu.gr) from where the articles can be read or printed.
