KONSTANTINOS KARNASSIOTIS, Academy Institutions and Cultures

### DEPUTY PUBLISHING DIRECTORS

ARISTOTELIS MENTZOS, Aristotle University of Thessaloniki

SPYRIDON PAVLIDES, Aristotle University of Thessaloniki

ELPIDA HADJIDAKI, Archaeologist, past Director, Underwater Antiquities, Greek Ministry of Culture

The STOA OF SCIENCES constitutes a periodical Scientific Edition of the Academy of Institutions and Cultures, aiming to the development of a continuous dialogue between the Scientists, the international Academic Society, and the citizens.

Through this edition we promote the expulsion of the mechanistic conception for the promotion of Science and the strengthening of Morality, as an ingredient part of progress, in Research. We wish, instead of the murky research routes, to promote the “democratic” Science, that is the Science which takes into consideration the Society at the ecumenical level and aims to meet the needs for a global Paideia, without disregarding the fundamental questions about the beginning and the end of our Cosmos, at a naturalistic, ethical and anthropocentric level.

The articles, which are published after their approval in the Volumes, come from the entire spectrum of Knowledge and they are not restricted to any commitment as to length or illustrative material. The material is distributed thematically and per volume with adherence to strict academic criteria, as well as with consideration on its comprehension by Society. The publications are released in Greek, French, English, German, Italian, Spanish and Russian, according to the publishing guide-lines.
